

Elevated Vacuum Locking System Training Class

Our Elevated Vacuum Locking System (EVLS®) Training Class allows you to acquire first hand experience with the EVLS® to help you better understand its benefits; and at **no charge** for the class.

Presenters will include a certified prosthetist, licensed certified physical therapist, and a billing and coding specialist. Topics will include elevated vacuum theory, patient evaluation, measurement and casting for use in CAD systems, single wall socket fabrication, patient fitting and training, and billing and coding. These professionals will guide you through the course and welcome open discussion along with Q&A.

Completion of the course will include **8 ½ Continuing Education Credits (CEU's)**. Come network and learn how you can better care for your patients with **Prosthetic Design Inc.**

Highlights

- Participants receive 8.5 CEU's with one day training class.
- Learn theory and benefits of the Elevated Vacuum Locking System.
- Introduction to Physical Therapy, Coding and Billing
- Open discussion of the entire fabrication process.
- Hands on training for evaluation, fabrication and fitting
- **No Charge!**

Register online at least one week prior to the course or call for more information. We look forward to hearing from you and hope you will join us here at Prosthetic Design for a day of learning and discussion.
